DETAILED ACTION

Allowable Subject Matter

1. Claims 1-9 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art does not disclose or suggest means for releasably attaching the flexible enclosure to the flexible back surface of the glove body at a position adjacent to the knuckle portion of the user's hand in combination with a work glove having a glove body with a flexible back surface, a flexible enclosure having upper and lower layers permanently attached about their peripheries to define a completely enclosed interior surface, a plurality of magnets disposed in spaced-apart relationship within the completely enclosed interior space of the flexible enclosure and magnet-insulating means disposed within the completely enclosed interior space. The magnet-insulating means is constructed and positioned to minimize magnetic interference between adjacent ones of the plurality of magnets and to prevent the plurality of magnets from sliding about within the enclosed interior space. The exterior surface of an upper one of the two-layer enclosure provides a substantially planar surface for receiving and retaining metal components against the exterior surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
